Primary Examiner

The following is an examiner's statement of reasons for allowance: The prior art fails to teach a method and apparatus for identifying an object in a laser beam illuminated scene based on material types, among other features, comprising: a laser source for emitting and illuminating a predetermined scene with a pulsed beam having different discrete wavelength emission components; second optical elements for receiving return laser pulses from the object and separating each return laser pulse into return components corresponding to the different discrete wavelength emission components; a first processing circuit for determining spectral reflectance values of each return laser pulse and generating reflectance signals representative thereof; and a second processing circuit for determining a material type for each return laser pulse, indexing each determined material type to a position in the illuminated scene, and identifying an object in the scene based on material types and indexed positions in the scene.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

1) Christians et al 6,139,323 disclose an optical weapon effect simulation method and system including a spectral analyzer.
